

JOB OPPORTUNITY - FORESTRY LECTURING IN PAPUA NEW GUINEA

Fancy working in one of the most unexplored and biodiverse places on the planet?

The Papua New Guinea University of Natural Resources and Environment, based on the island province of East New Britain, is recruiting enthusiastic, adventurous, and committed graduates from a forestry, ecology, international development, or related Masters programme.

We are offering a competitive salary with International Market Allowance and an annual bonus on a three-year contract. Housing will be provided on the campus.

You will be working with the Head of Department and other staff in order to deliver a new sustainable forestry programme, in a country where illegal logging and oil palm expansion threatens some of the most unique and biodiverse forest ecosystems in the world.

You will have ample opportunity to explore your own research interests, and there are countless opportunities to progress a PhD or post-doc project in collaboration with other universities and funding organisations.

This opportunity is ideal for those with a sense of adventure who want to kick-start their career working in a developing country context.

You will need to be fit and adaptable, and there will be challenges to overcome, but the rewards are immeasurable and opportunities endless for the right applicants.

For further information or to discuss in person, please contact the Head of Sustainable Forestry, Leo Dawson, at ldawson@unre.ac.pg or leopoldforestry@gmail.com
