Dr. Annika Hillers
Country Representative
World Chimpanzee Foundation
Tubman's Boulevard
Congo Town
Monrovia, Liberia

Dear Dr. Hillers:

The Management of the Forestry Development Authority (FDA) extends its compliments and, at the same time, wishes to inform you that after full consultation with the communities surrounding the Krahn Bassa Proposed Protected Area, and in alignment with the findings of the Joint Technical Teams Report from the Ministry of Mines and Energy and the Forestry Development Authority (FDA), the Government of Liberia, through the FDA, is pleased to submit the final Aerial Map of the Krahn Bassa Proposed Protected Area.

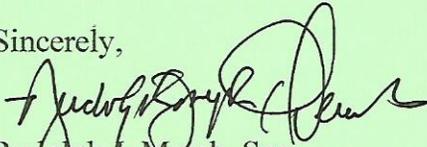

The updated map clearly delineates Exploration Mineral Licenses that have now been excluded from the Krahn Bassa Proposed Protected Area. Additionally, to prevent illegal trespassing and to ensure proper management, the FDA has established a three-kilometer buffer zone, accompanied by geographic coordinates between the mining concessions and the Proposed Protected Area. As a result of these adjustments, the new total size of the Krahn Bassa Proposed Protected Area stands at **171,888 hectares** or **424,735 acres** of contiguous primary forest cover.

Given these developments, the FDA kindly requests that you proceed with updating the necessary documentation to facilitate the **gazettement** of the Krahn Bassa Proposed Protected Area as soon as possible. In the coming days, we will also submit the revised **Metes and bounds** for incorporation into the gazettement documents.

Thank you for your patience and collaboration as we work together in the interest of our **People, Planet, and shared Benefits**.

Kind regards,

Sincerely,

Rudolph J. Merab, Sr.
Managing Director
