

# **Berlin road extension**

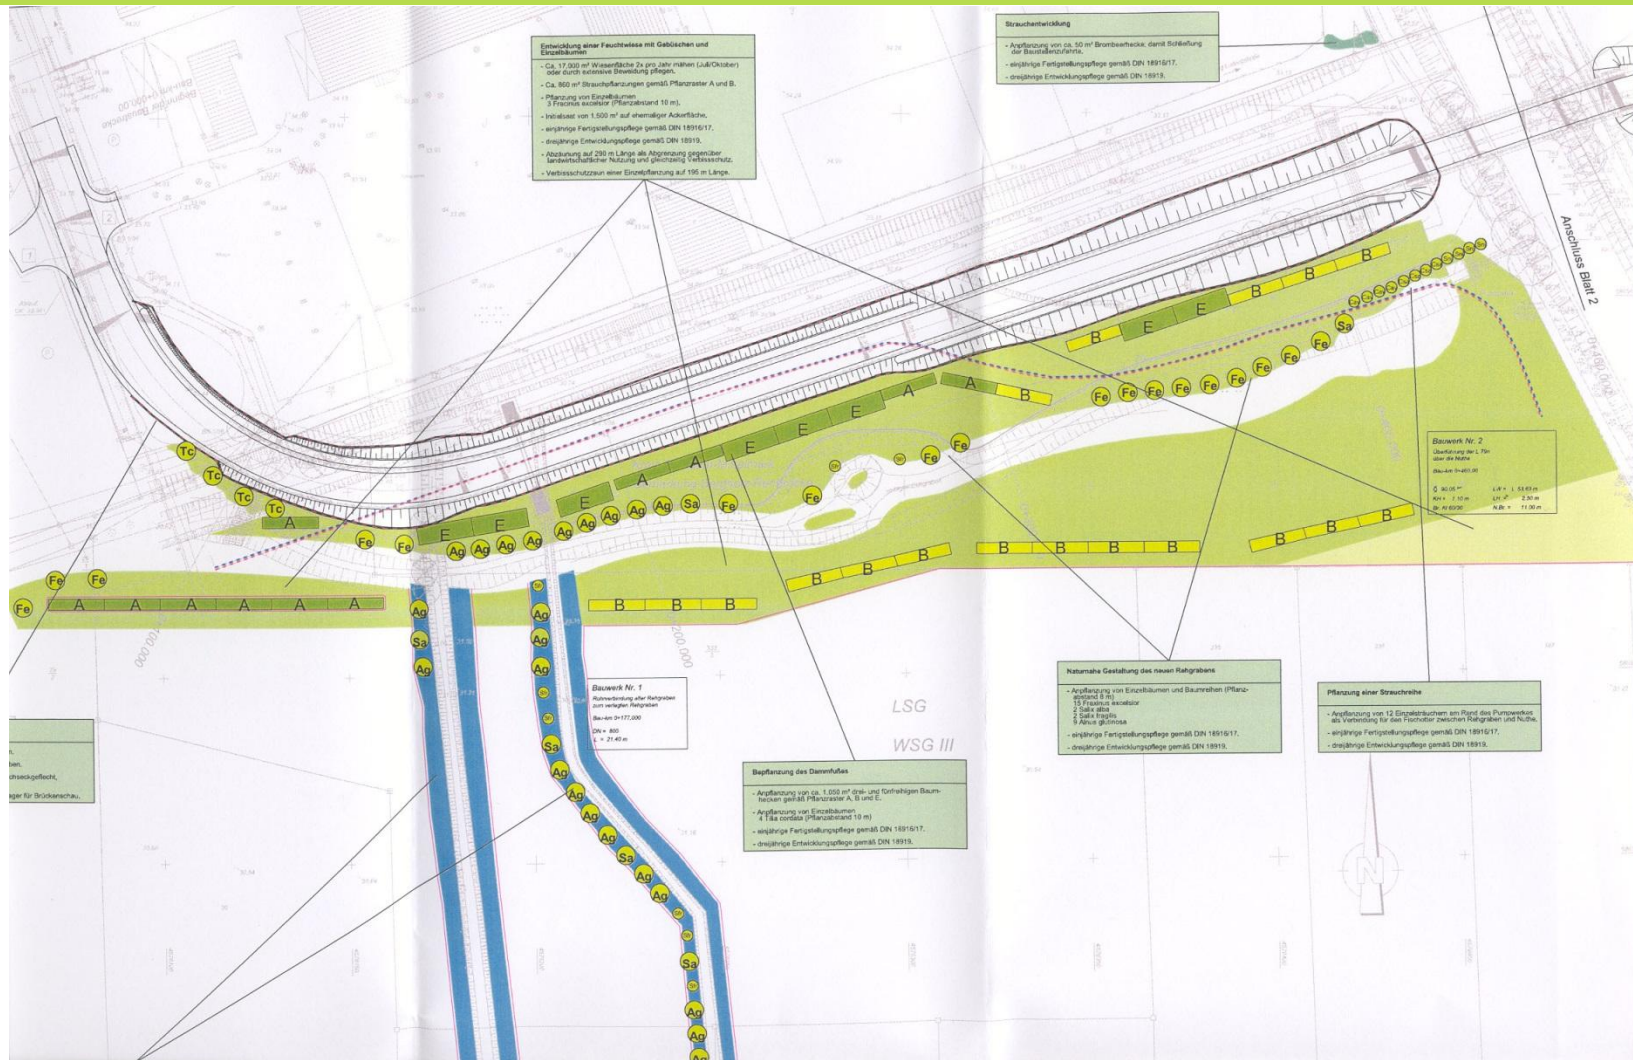

**Wolfgang Wende & Marianne Darbi,**

**IOER Dresden**

**Session 3 –No Net Loss and Net Gain on the  
Ground**

# Bypass road – detail

# Avoidance, minimization

# Compensation, offset

## Making a success of No Net Loss: recommendations to companies, to governments, and to the conservation community':

- Establish a new tool for the 'normal landscape' (beyond FFH)
- Give priority to avoidance and minimization
- Design and plan measures clearly (e.g. landscape maintenance plan)
- Establish a legal mandatory framework as a pre-requisit for success
- Design creative measures (e.g. improving shelters for bats example)
- Accept limitations to what can be an offset
