Strategies of Global International Marketing

1. Challenge and opportunity of WTO;
2. International green trading strategy;
3. Emphasis on both environmental protection and quality control;
4. Advanced technology for the plantation industry;
5. Comply with international standard and criteria.
Social Responsibility

1. The criticism of “Syncretism of human and the universal”

2. Banking Belief of “Esquires also loves money but they will only get it morally”;

3. The concept of gumption stated that “the moral of the universal is very clear, the esquires will never depends on others and stand firm for himself”.
The Structure of Forest Management System

Continual Improvement

Policy → Objective → Organization → Document

Management Review → Monitoring → Operation Control → Training
Strengths

1. The ideal management strategies of Sino-Wood and the principal concerns of its top management;
2. Training and Communication (SDLP, SD conference, etc.)
3. Good foundation;
4. High qualification of our professional team.
Difficulties

1. Traditional concept of reforestation: ignorance of environmental protection and good management;
2. Weak foundation of forest management in China;
3. Costs increase;
4. Lack of local standard and certified models in China FSC in the past;
5. Imbalance of economic development in Mainland, low health and safety level;
6. Small size and scattered plantation plots lead to the difficulty of management.
Recent Targets

1. Pre-assessment conditions;
2. Progress of the on-going implementation system;
3. Proposed main assessment by the end of this year.
New Thoughts of China Forestry Management

1. Thoughts of forest engineering;
2. Concept of Forest Monitoring & Management System;
3. Thoughts of and diligence in localizing Green Certification.
