

# Legality Verification: What Should Voluntary Programs Include?

2<sup>nd</sup> Potomac Forum on Illegal Logging & Associated Trade

Jeff Hayward, Verification Services Manager, SmartWood Program

#### Businesses say they need verification

We will ensure that as a minimum, any virgin material in our supply chain comes from legal sources.

It is Kingfisher policy to work with our suppliers of timber and timber-containing products to *establish the* origin of the wood used. Independently verifiable documentation must be provided

IKEA minimum requirements on solid wood, veneer, plywood and layer glued wood:

- The origin of the wood must be known
- Wood must be produced in compliance with national and regional forest legislation

Companies undertaking commercial logging (from lands under their control) or primary processing of timber in "high risk" countries will be subject to standard *compliance with law representation*.

Trade participants will need to make public documented, time-bound commitments to phase out all trade in wood from unknown, illegal and controversial sources within 5 years.

#### High risk locations

#### Russian Federation

Honduras

Colombia **Ecuador** 

Brazil Peru

Bolivia

Ghana

Liberia C.A.R Ivory Cameroon Coast Gabon Congo D.R.C.

China

Burma

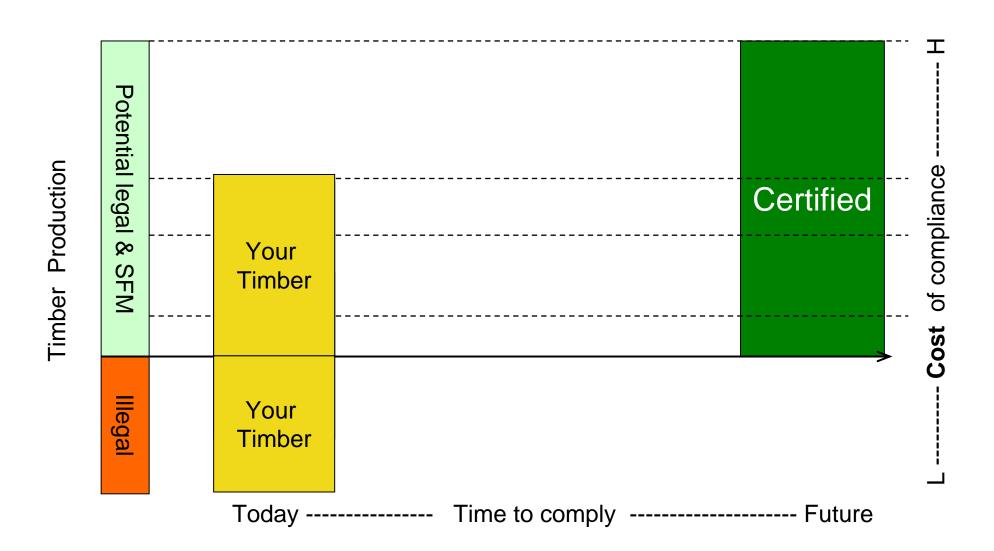

Laos Vietnam

Cambodia Malaysia Philippines

Indonesia

Papua New Guinea

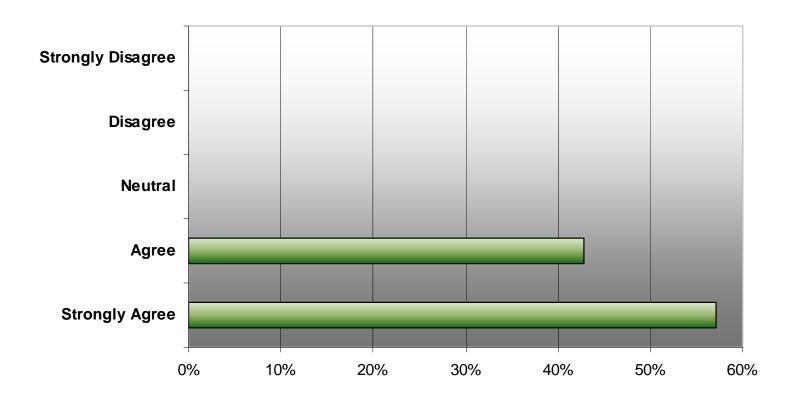

Rainforest Alliance, 2008 5

#### Legality verification should be transparent

Legality verification (VLO/VLC) is an important first step towards industry wide transparency.

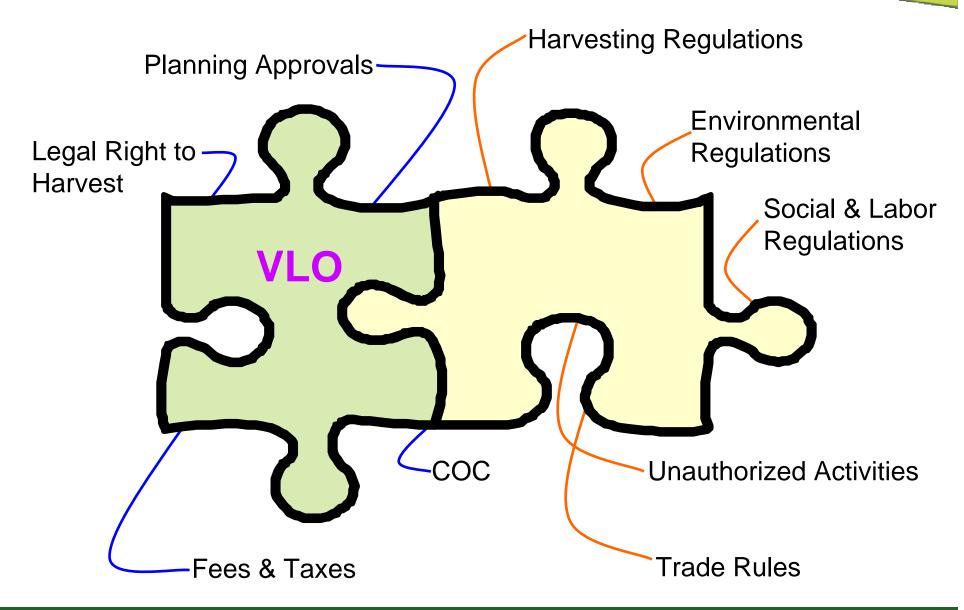

#### Standards for legal origin

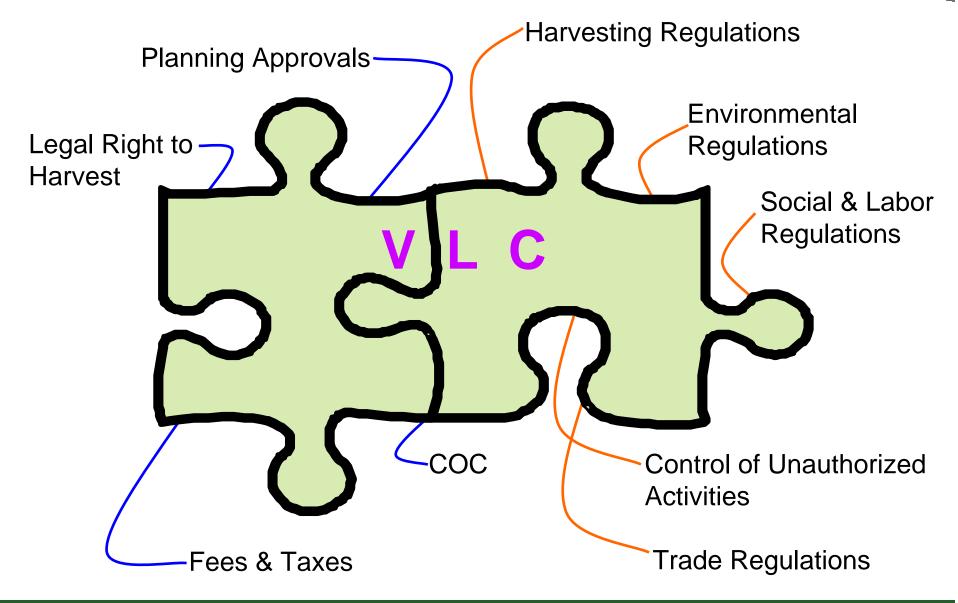

#### Standards for legal compliance

#### Standards for legal compliance

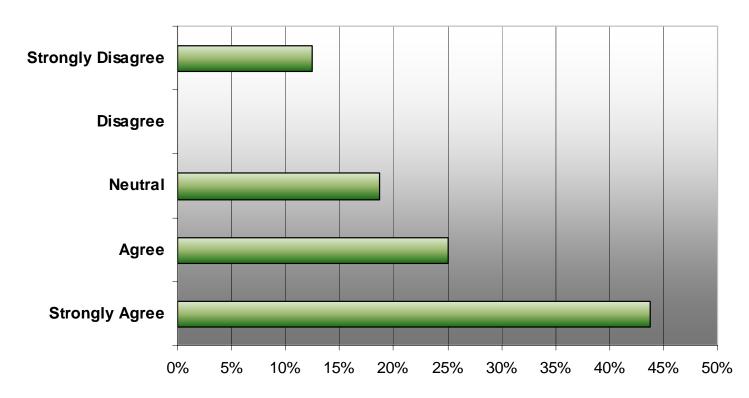

#### Legality verification should be linked to certification

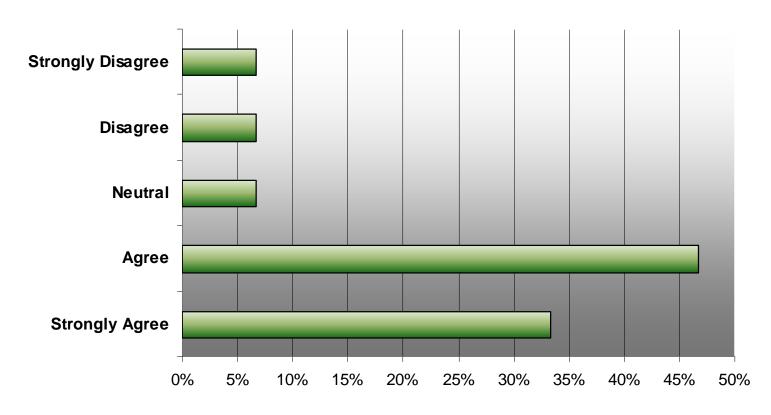

Legality verification (VLO/VLC) should be linked to a stepwise program of certification.

#### Legality verification should encourage progress

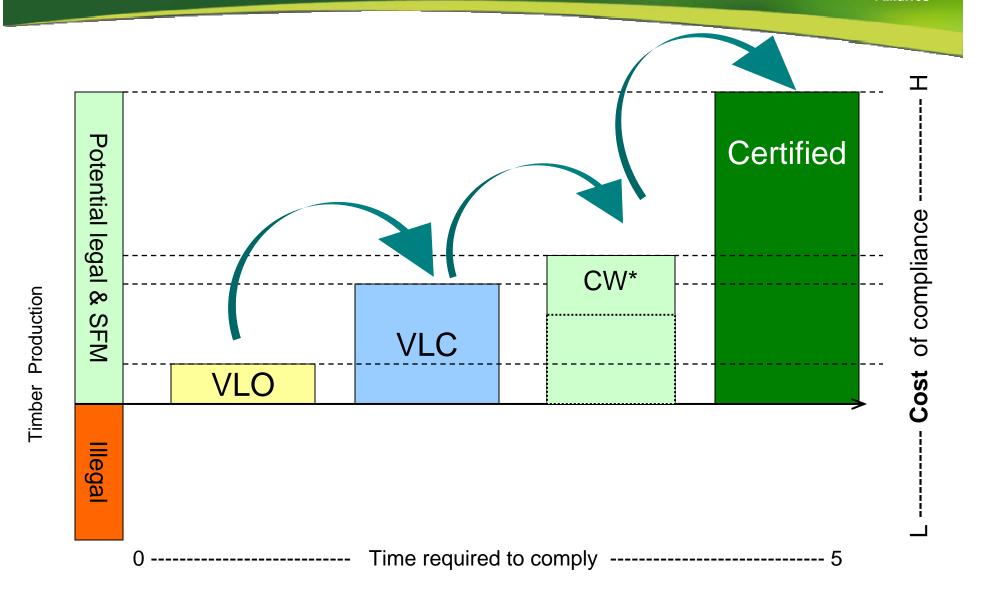

SmartWood should limit the time a company can receive VLO/VLC.

### Stepwise from legality to certification

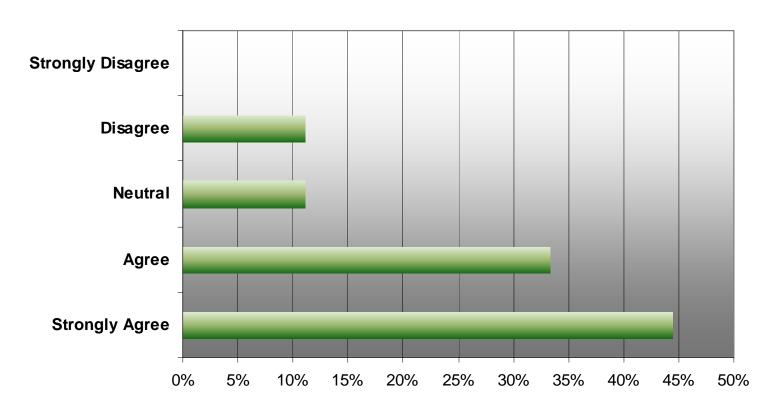

\*CW legal requirements may be less than VLC for some jurisdictions

#### Legality verification shouldn't compete

## Logos or claims should only be allowed in approved business communications

#### **Procedures & Policies**

- Robust chain of custody back to harvest site
- Regular and frequent auditing (including spot checks)
- Communication and claims strictly controlled
- Public reporting on performance
- Recognition of customary rights and law

#### **Process & Governance**

- Inclusion of stakeholders in standards development
- Corruption, poor governance, improperly obtained rights
- Country specific standards should be developed
- Agreement on common international legality definition
- International oversight, accreditation, a single standard

#### Thank you...
