Forest Management and Timber Trade
Lao PDR

Khamla P. and Sithong T.
Faculty of Forestry, National University of Laos

Workshop on Forest Trade and Market Reform in Mekong Region
RECOFTC, THAILAND
21 - 22 August 2008
Forest Management

- Early stage managed by State Own Enterprise Companies, each own forest area of 200,000 – 300,000 ha

- Until late 80’s, the lost of invaluable biodiversity was recognized and the government issued legislation for forest protection

- New Economic Mechanism in 1986, forced to reform the forest management system from the centralization to decentralization, however the logging quota has to be acknowledged from the central government
Forest conservation were enhanced, 20 NBCAs have been declared in 1990 as well as the provincial and district conservation were established.

Early 1990 forest plantation for timber exports have been encouraged and implemented widely through the country.

Since 1990’s the legal stuff in Laos has been rules by laws, in 1996, the first forest law was issued and had been updated in 2005 and 2008.

Forest protection have been enhanced through the implementation of land use.
In 2007 the forest classification system has been revised and the institution arrangement have been updated.

Forest development strategy to increase forest cover until 2020.

Pilot project for sustainable use of forest and rural development have been established in 2004 (FOMACOP 1999-2002), and currently extent to all provinces.
Enrolment in many international convention such as UNCCD, CITES, REDD, etc.

Challenge and issue

- Land investment policy for agri-business
- Infrastructure development impacts on land use and forest cover
- Transparency on Timber trade
- Community involvement in Forest Mgt.
Timber Trade and flow
Types of Timber Quota

- Exported loggings quota managed by central government
- Infrastructure development (Hydropower, road construction, resettlement etc.)
- Timber for domestic consumption

Major Sources of Timber

- Infrastructure/Hydropower/Resettlement
- Production forest
- Plantation (teak in the north)
Issues of timber extraction

- Harvesting quota
  - Quota vs Actual cut
- Illegal logging
- Timber grading
  - Flat price or grading?
- Marketing
  - Market network/commodity chain
  - Value added products (certification)
Other Related Issues

- Inaccuracy of official statistics
- Much of wood consumption is largely unrecorded
- Decentralization of forest management
- Quality of wood processing industries
Research?

- Decision making process on logging/quota
- How to involve REDD in current forest mgt.
- The Indigenous knowledge on forest mgt. (pushing into legal framework, including tenure scheme on communal forest land)
