

## No Net Loss goal

### Companies commit not to cause further loss of:

- the extent and quality of all (semi)natural ecosystems in the EU
- the quality of surrounding cultural landscape in the EU
- the extent and quality of a selection of (semi)natural ecosystems world wide

#### Unit of measure

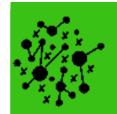

- Extent: ha

- quality of ecosystems: species composition (MSA)

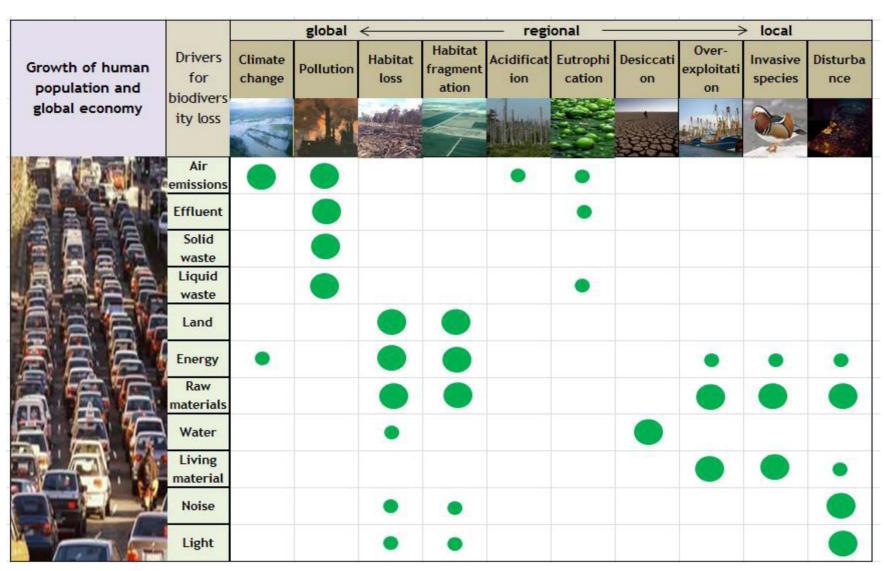

- reference date: 2011

## Realization through:

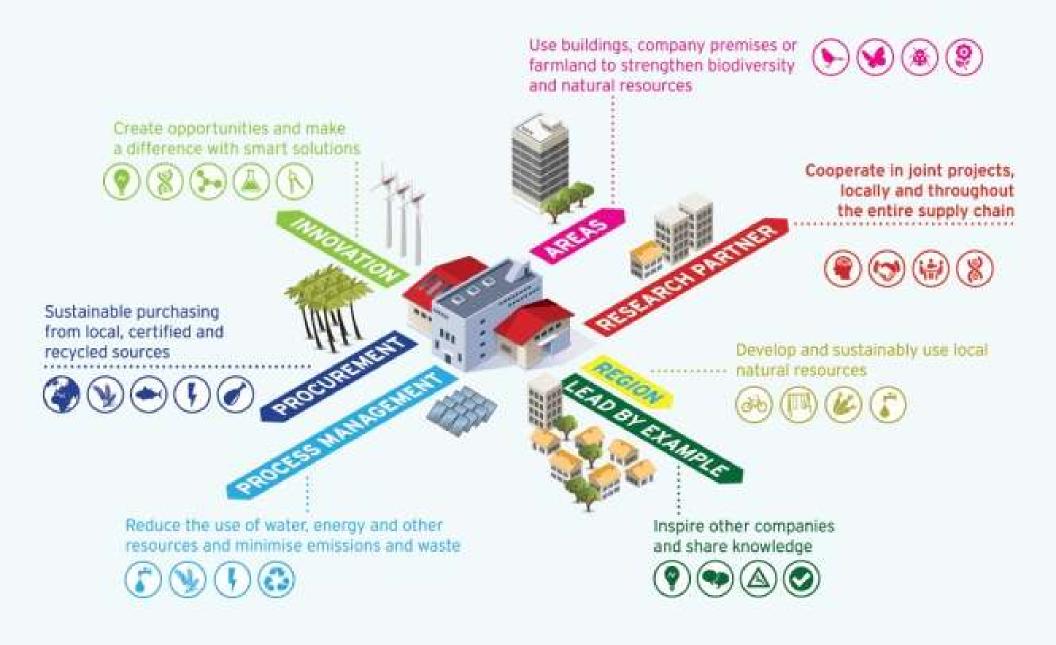

- co-operation; NNL is a joint effort
- application of the mitigation hierarchy
- zero-impact of pressure factors

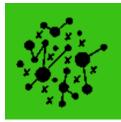

### **Pressure factors**

# How companies can contribute to biodiversity

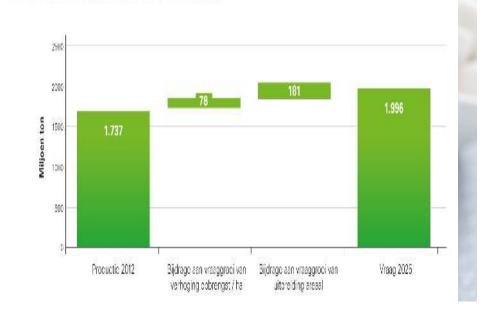

# **Reduce impacts**

Figuur 6: Rietsuiker - Scenario's voor het voldoen aan de toekomstige vraag Bron: OESO-FAO Agricultural Outlook 2013-2022; KPMG-analyse

## **Avoid/ mitigate:**

- Improve processing
- •Use material with lower footprint, sugar beet instead of sugar cane
- promote productivity in current production area

### **Innovate**

- •Use new materials, like Stevia:
  - -200x sweeter
  - -area needed -80%
  - -CO2 -72%
  - -water -96%

KPMG, 2014

### Recommendations to the EU

- Work with all stakeholders
- Stimulate rather than regulate
- Stimulate uniformity in the approach
- •Include all pressure factors, not just land-use
- Pay attention to the whole value chain
