Establishment and Operation of China Green Carbon Fund

Li Nuyun

Deputy Director of Afforestation Department, SFA
Deputy Director of Climatology Office, SFA

Dec 17th 2008

Contents

- I. Background
- II. Establishment and operation pattern of China Green Carbon Fund
- III. Future prospect of China Green Carbon Fund

1.Few carbon sequestration programs in clean development mechanism

- Because he Kyoto Protocol regulates complicated approval and assessment procedures for forest carbon sequestration programs, in addition to low price and some countries' reluctance to accept, carbon sequestration programs seemed inactive, featuring "existence of demand but lack of market."
- International eco-service market is bourgeoning.
- The demand of modern forestry development: To realize the ecological benefit value of forest through market.
- Actively push the fostering of Chinese carbon sequestration market forward!

2. Set up new financing platform for afforestation

- Enterprises constitute the main body emission.
- China, under the precondition of not undertaking emission reduction obligation, shall encourage enterprises to invest in afforestation, increasing carbon sequestration, fulfilling social responsibility and promoting the marketization of ecological benefit of forest.
- Help increase public awareness, seek for low carbon production and living channel
- Set up a platform for enterprises and the great public
- --China Green Carbon Fund

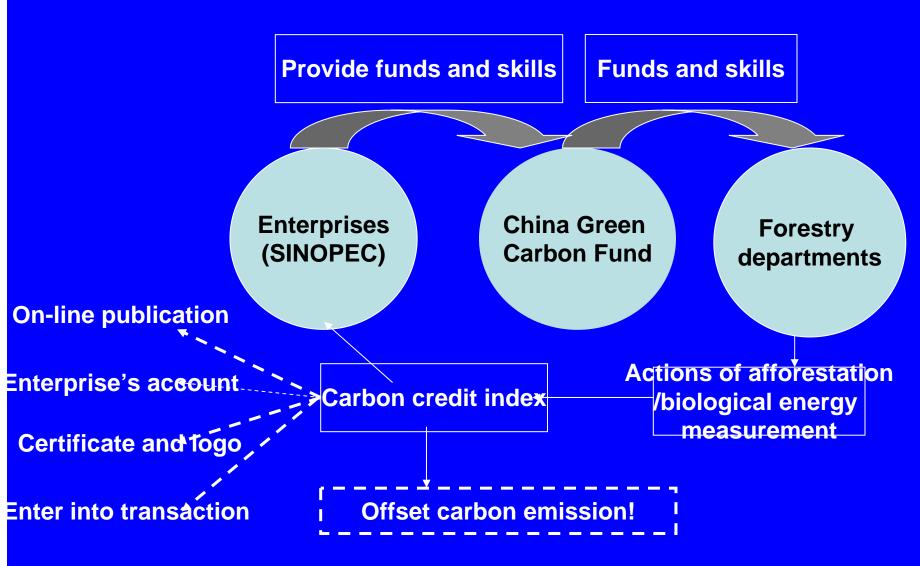

II. Establishment and operation of China Green Carbon Fund

1. Operation procedure of China Green **Carbon Fund China Green Fund** The Council Stage I China Green **Special Fund Council Establish relevant Carbon Fund** agencies Organize the project **Carbon sequestration** implementation measurement and monitoring by SFA **Carbon sequestration** Afforestation, forest and energy forest inspection and carbon (the ownership belongs to Stage II sequestration the forest grower) measurement Organize carbon **Public notice on the Forest land contractor** sequestration project web-site or renter makes profit by selling resources **Enter into Stage III Increase farmer's** income

2. Implementation pattern of China Green Carbon Fund

3. Benefits for enterprises

a. Get measured, verified and registered carbon sequestration credit index b. The provided funds shall be deducted in full before tax (25%)

c. Cultivate professional personnel with intimate knowledge of ecological products production, measurement and monitoring d. Accumulate experience through participating in carbon trading activities e. Set up green marketing image, strengthen enterprise's public influence and reputation on the market

4. Receipt and voucher for individual buyers

说明:

- 1.此凭证为志愿出资购买碳补偿的证明。
- 2.此凭证与中国绿化基金会收款收据配套使用。
- 3.购买人可根据编号登录"中国碳汇网" (www.fcarbonsinks.gov.cn) 杏椒相关信息。
- 4. 碳补偿:出资购买通过造林项目活动产生的碳汇额度,以补偿出资人因某项活动或日常生活所排放的二氧化碳。

6. Management of China Green Carbon Fund

Regulations on Fund Management of the State Council

Rules on Special Fund Management of China Green Foundation

Measures on Capital Management for China Green Carbon Fund

Measures on Management of Carbon Sequestration Project of China Green Carbon Fund

Interim Regulations on Carbon Sequestration Afforestation Technologies for China Green Carbon Fund Guide on Measurement and Monitoring of China Green Carbon Fund Projects

III. Future development of China Green Carbon Fund

- 1. To carry out programs
- Afforestation and re-afforestation, forest management;
- Conserve biodiversity;
- Grow various memorial forests, promise to grow and maintain green lands, fulfill ecological rehabilitation, etc.;
- Strengthen forest land conservation and management, reduce deforestation-caused carbon emission;
- New forest species fostering and technological development aiming at public welfare;
- Construction, development and utilization of bio-energy bases
- Develop clean energy for rural area, promote energy-saving kitchen ranges to improve farmer's life quality.

• 2. Establish carbon sequestration measurement system with Chinese characteristics

Guide on Measurement and Monitoring of China Green Carbon Fund Projects

Organize the formulation of measurement, monitoring and relevant standards

Carry out education and training, and implement qualification management;

3. Strengthen publicity

Increase national people's awareness of ecological environment and climate conservation through various effective forms to promote the construction of ecological civilization in China;

4. Conduct international cooperation

Carry out international cooperation and communication on public welfare undertakings for climate change, and seek for international sponsorship to fund program activities

5. Advance the progress of Chinese ecoservice market

Carry out market study

Formulate carbon sequestration transaction rules

Carry out pilot trading

Facilitate legislation

Facilitate legislation on emission trading, and fully consider to offset emission by carbon sequestrtion, so as to establish a real eco-service market!

Thank you!
